CASE CARE INSTRUCTIONS

CONGRATULATIONS ON YOUR PURCHASE OF A VAULT CASE. TO GET THE MOST OUT OF YOUR VAULT CASE, FOLLOW THESE SUGGESTED TIPS:

1. HUMIDITY

Exercise caution in high humidity climates. We recommend the regular use of silica-gel moisture absorbing packets which are available through Pelican (CAT. #1500D). These packets may be reused over again many times by drying out in an oven.

2. O-RING

To maintain the watertight seal, the O-Ring must be kept clean of dirt and debris. If the O-Ring becomes cut or cracked, it must be replaced. Your Pelican dealer can offer you replacement parts.

3. CLEANING INSTRUCTIONS

Most dirt and stains can be removed quickly with mild soap and water and a soft sponge. Do not use any type of brush that will scratch the surface.

4. SOLVENT, FUEL AND LUBRICANT EXPOSURE

Certain solvents, fuels and hydraulic oils may affect the performance of your case. In the event of spills, remove solvent, fuels or oil with a clean cloth.

5. SOLID FOAM

Your Pelican Case comes with solid foam, follow these steps to customize your case:

- a. Lay out all items on the top of the foam to your liking.
- b. Using chalk, trace around the items to create an outline. Leave at least one inch of foam between items and walls of the case.
- c. Remove components from the foam.
- d. With the foam protruding over the edge of a table use an 8" electric knife or very sharp blade and begin cutting at a 90° angle, 1/4" within the outline to insure a snug fit.
TIP: When using an electric knife do not saw foam, let the blade flow smoothly. When squaring corners cut into corner from opposite directions.
- e. If a mistake is made, use rubber cement or spray adhesive* to repair the foam.
- f. Remove the chalk outline with a damp cloth or brush. Do not close the case while foam is damp.
- g. We recommend gluing the cut section to the bottom layer of foam to reduce the movement of items inside the case when transporting.

INSTRUCCIONES PARA EL CUIDADO DE LA MALETA

LO FELICITAMOS POR LA COMPRA DE SU VAULT CASE. PARA APROVECHAR AL MÁXIMO SU VAULT CASE, SIGA ESTOS CONSEJOS:

1. HUMEDAD

Es aconsejable tomar algunas precauciones en los climas muy húmedos. Recomendamos el uso regular de paquetes de gel de sílice absorbente de la humedad, disponibles a través de Pelican (NÚM. CAT. 1500D) Estos paquetes pueden reutilizarse una y otra vez tras secarse en un horno.

2. JUNTA DE SELLADO

Para conservar la estanqueidad es preciso mantener la junta de sellado libre de suciedad. Si una junta sufre algún corte o presenta grietas, debe sustituirse. Los distribuidores de Pelican disponen de piezas de recambio.

3. INSTRUCCIONES DE LIMPIEZA

Gran parte de la suciedad y las manchas pueden eliminarse con una esponja suave con agua y jabón neutro. No utilizar cepillos de ningún tipo, ya que la superficie podría rayarse.

4. EXPOSICIÓN A SOLVENTES, COMBUSTIBLES Y LUBRICANTES

Ciertos solventes, combustibles y de aceites hidráulicos pueden afectar al rendimiento de la maleta. En caso de derrames, elimine el solvente, los combustibles o el aceite con un paño limpio.

5. ESPUMA SÓLIDA

Si la maleta Pelican contiene espuma sólida, se puede personalizar de la siguiente manera:

- a. Distribuir de la forma deseada todos los objetos encima de la espuma.
- b. Trazar la silueta de los objetos sobre la espuma con una tiza. Dejar al menos un espacio de 2,5 centímetros entre los objetos y las paredes de la maleta.
- c. Retirar los componentes de la espuma.
- d. Con la espuma sobresaliendo del borde de una mesa, cortar en un ángulo de 90° con un cuchillo eléctrico de 20,3 cm o una hoja muy afilada, unos 6 mm por dentro del contorno de los objetos para garantizar un buen ajuste.

CONSEJO: Si se utiliza un cuchillo eléctrico se recomienda no cerrar la espuma, sino dejar que la hoja se deslice con suavidad. Al esquadrar las esquinas, cortar hacia la esquina desde direcciones opuestas.

- e. Si se comete algún error, utilizar un adhesivo elástico* o un adhesivo en aerosol para reparar la espuma.
- f. Eliminar los rastros de tiza con un paño húmedo o un cepillo. No cerrar la maleta mientras la espuma esté húmeda.
- g. Recomendamos encolar la sección cortada a la capa inferior de la espuma con el fin de reducir el movimiento de los objetos en el interior de la maleta durante su transporte.
